

ABCs of Breast Disease: ACTIONS BEFORE CONSULT

Satellite Conference and Live Webcast

Wednesday, March 24, 2010 • 1:00-3:00 p.m. (Central Time)

2:00-4:00 p.m. (Eastern) • 12:00-2:00 p.m. (Mountain) • 11:00 a.m.-1:00 p.m. (Pacific)

There are more than two million breast cancer survivors in the United States and much of that success can be attributed to modern medicine and early detection efforts. In fact, when caught early, the five year breast cancer survival rate is over 90%. This is why it's crucial to stay up to date on recent advancements in diagnostics, treatment, and management. During this training, program faculty will present the latest findings in these areas.

PROGRAM OBJECTIVES

1. Discuss the importance of breast cancer screening.
2. Explain how to manage abnormal CBE results and/or breast complaints.
3. Explain how to interpret the mammogram report.
4. Identify when a surgical consult is needed.
5. Discuss methods to diagnose breast cancer.
6. Discuss recent changes in management/treatment of breast cancer.

FACULTY

Donna Lynn Dyess, MD
Professor of General Surgery
University of South Alabama
Mobile, Alabama

CONFERENCE DETAILS
